The **UH Story Time** program is part of UH Cares for You, which offers peer support to individual UH staff, both clinical and non-clinical, who are involved in, or affected by an unanticipated adverse patient event, medical error, or patient related injury.

These experiences can harm our emotional and physical health and subsequently compromise patient safety.

During **UH Story Time** the scheduled speaker shares their experience of working in healthcare. It is a time for UH staff come together, listen, and support one another.

**Please join us for the next UH Story Time and support our UH family.**
